Regulatory Reference: 115 CMR 5.12

S:\Agency Policy\6 - Program Related Policies and Procedures\6.0.22 HRC Review of Health Related Supports with Restrictions

The Human Rights Committee must annually review health supports and devices that are in place due to behavioral concerns. The review form is completed by the Human Rights Coordinator with information from Program Staff, and presented to the Human Rights Committee for review and signature. Once reviewed, the form is returned to the program for additionally required signatures.

After all required signatures are obtained, a copy must be maintained with the Human Rights Coordinator, and a copy must also be maintained in the person's legal file. If you have any questions about these, or any other supportive or health related device, please speak with your supervisor or the Human Rights Coordinator.
